

Effective Programming Practices for Economists

# Reproducible Research

Directory structure in the templates

Janoš Gabler and Hans-Martin von Gaudecker

# Guiding principles

- Clear separation of inputs and outputs
  - need separate ``src`` and ``bld`` folder
- Group files in directories by step of the analysis
  - need ``data_management``, ``analysis``, ``model_specs``, ``final`` inside ``src``
- Separation of long-running analysis tasks from fast visualizations
  - need to separate ``analysis`` and ``final``
