

Effective Programming Practices for Economists

Basic Python

Executing notebooks in VS Code

Janoś Gabler and Hans-Martin von Gaudecker

Preparation

We assume you have:

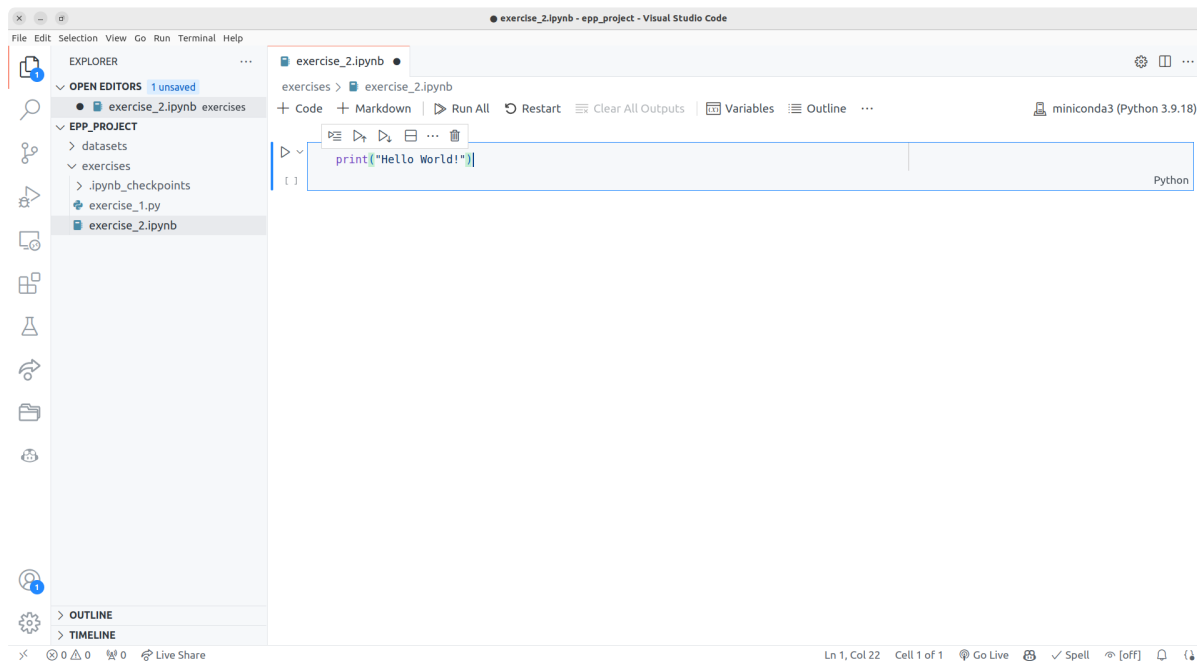

- Installed anaconda and created the course environment
- Installed VS Code with all relevant Python extensions
- Opened the root directory of your project in VS Code

Example project structure

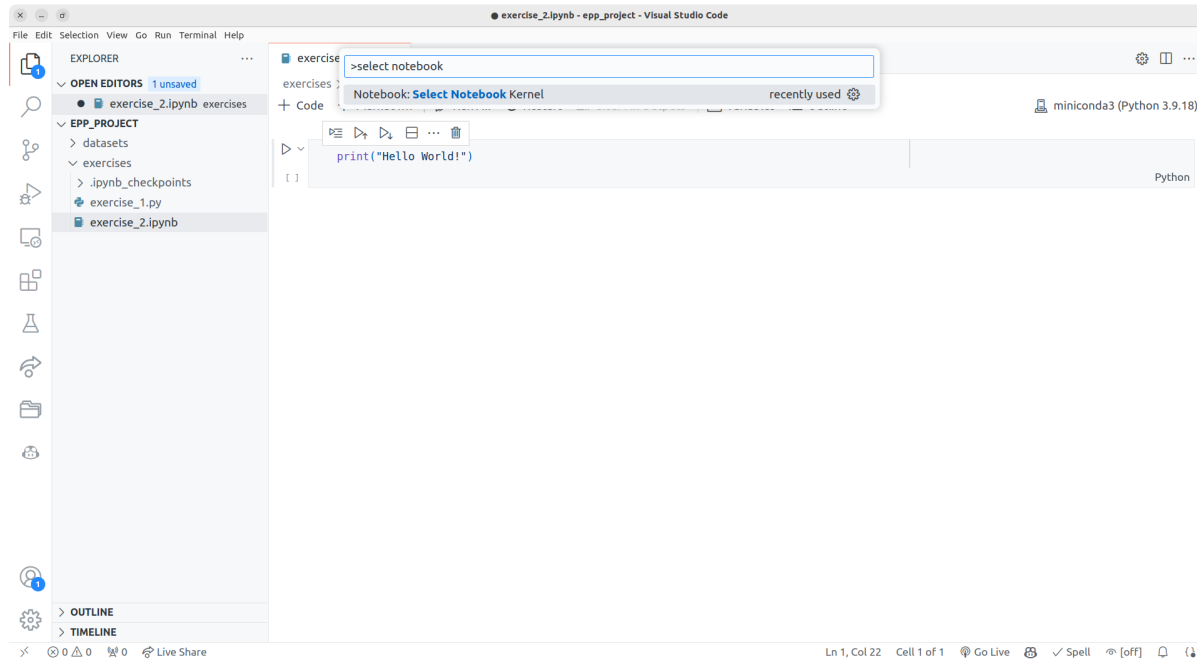

- The entire directory ``epp_project`` is opened in VS Code
- We want to run ``exercise_2.ipynb`` in VS Code

1. Open the file

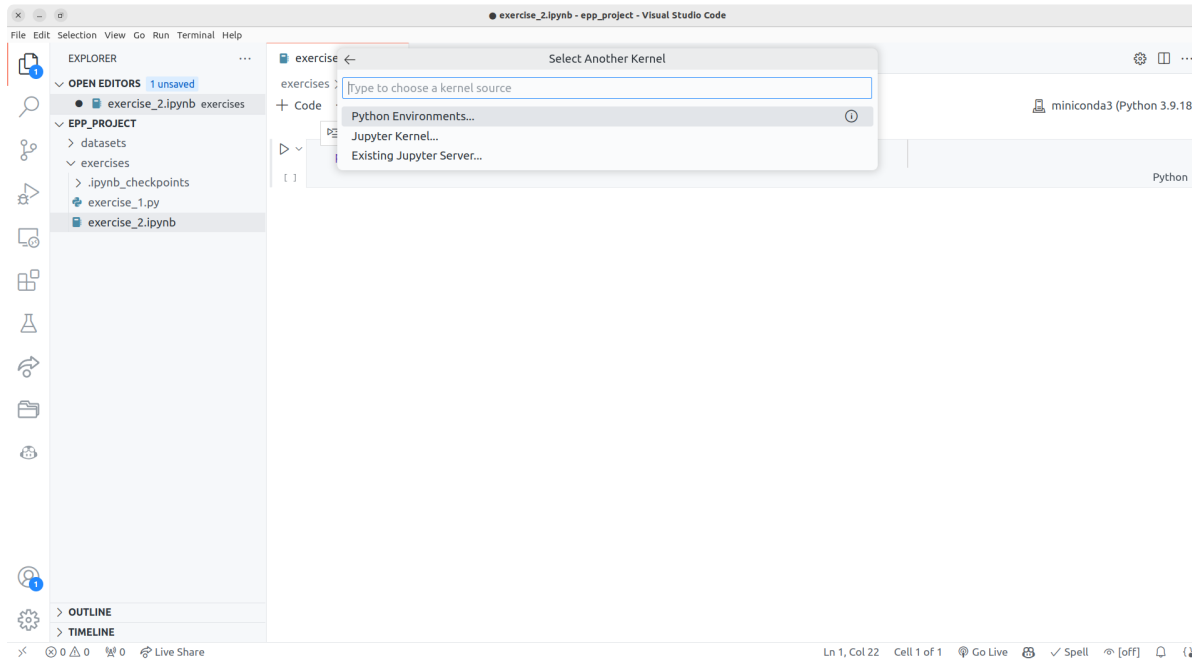

2. Command palette (ctrl + shift + p)

3. Click on "Select another kernel"

4. Click on "Python environments"

5. Select the epp environment
