

Effective Programming Practices for Economists

Basic Python

Executing notebooks in a browser

Janoő Gabler and Hans-Martin von Gaudecker

Preparation

- We assume you have installed anaconda and created the course environment
- Open a shell in the root directory of your project
 - On Windows, use the anaconda prompt or the powershell
 - If conda is not recognized in the powershell, check out this [stackoverflow post](#)
- Activate the environment using `conda activate epp`
- Confirm the activation worked using `conda info`

An error occurred on this slide. Check the terminal for more information.

Example project structure

- Our shell is in the `epp_project` directory
- We want to run `exercise_2.ipynb` in the browser
- Command is `jupyter notebook`

An error occurred on this slide. Check the terminal for more information.
