## **Effective Programming Practices for Economists**

## **Plotting**

Working with graph objects

Janoś Gabler and Hans-Martin von Gaudecker

## Three ways of using plotly

- As Pandas backend
- High-level interface: `plotly.express` (`px`)
- Low-level interface: `plotly.graph\_objects` (`go`)

## What to plot?

- Life expectancy over time in Europe and Americas
- Trend for each country
- Make plot easier to read
- Highlight Poland and Canada
