Effective Programming Practices for Economists

Basic Python
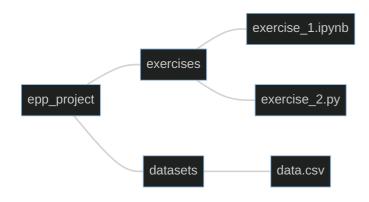

Executing ".py"-files from the shell

Janoś Gabler and Hans-Martin von Gaudecker

Preparation

- We assume you have installed anaconda and created the course environment
- Open a shell in the root directory of your project
  - On Windows, use the anaconda prompt or the powershell
  - If conda is not recognized in the powershell, check out this <u>stackoverflow post</u>
- Activate the environment using `conda activate epp`
- Confirm the activation worked using `conda info`

An error occurred on this slide. Check the terminal for more information.

Example Project Structure

- Our shell is in the `epp_project` directory
- We want to run `exercise_1.py`
- Command is `python exercises/exercise_1.py`

An error occurred on this slide. Check the terminal for more information.
